Cable assemblies & wire harnesses

At NORDHILL ELECTRONICS we can manufacture wide range of cable and wire assemblies, including external cabling, internal wiring, ribbon cables and coaxial cables. We can utilize any major manufacturer's connectors and cables. We provide testing and marking of product according to customer requirements. As an electronics manufacturer we have extensive experience in electronic device assembly. Wire harness assembly could be combined with electromechanical device assembly - from front panel to complete device, to suit any customer need.

NORDHILL ELECTRONICS customer service

Our team aims at close cooperation and communication with the client during all phases of the project, from start to finish. This helps to ensure that results are delivered on time, in high-quality and at competitive prices.

- You speak directly to Regional Sales Manager
- Your Key account manager will keep you updating and will be responsible for your account
- In case of a big and complex project – our project manager will be coordinating your project and will be responsible for updates of it.

Services & Capabilities

NORDHILL ELECTRONICS manufacturing capabilities – low and medium volume customers' needs:

- Single wires
- Multi-Conductor Cables
- Flat ribbon cables
- Cable assemblies
- Power cables
- Automated Cable cut and Strip
- Manual strip
- Crimping (manual and press)
- Soldering
- Braiding and Twisting
- Crimp pull testing
- Assembly testing

Services & Capabilities

NORDHILL ELECTRONICS uses state of the art Schleuniger, Komax, GWL automatic equipment, Molex and TE connectivity premium grade hand tools in manufacturing process – from cable preparation to testing and is capable of providing certificates of conformance for every assembly.

Value added Services

NORDHILL ELECTRONICS provides value added services:

- Engineering, design and management services
- Quality testing and verification
- Prototype, production and development
- Consultation over chosen materials/components and suggestion on alternatives
- ERP system – to manage every step of operations in order to have the most efficient management of materials and resources
- Supply Chain Management – NORDHILL ELECTRONICS will only source components from trusty suppliers
- Logistics

Services

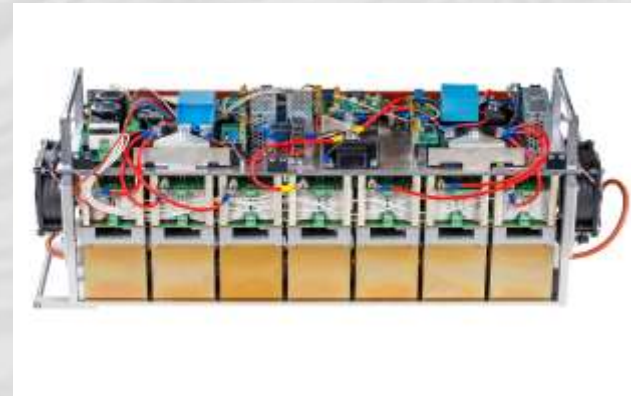

Assembly

We are your experienced and reliable partner for effective and pluggable solutions, assembling of decentralized distribution boxes of various complexity, manufactured according to provided specifications and schematics. Each projects is individually designed, assembled, tested, preprogrammed and labelled according to customer requirements. Performing assembling works we also include all necessary activities of checks and adjustments, to ensure that electronic components, cables and wires are correctly orientated, positioned, routed, secured, checked for electrical continuity and are tidy in appearance

Quality

NORDHILL ELECTRONICS

- Electronic programmable testing
- Visual inspection
- Low voltage continuity testing
- Checking by AQL table
- Functionality testing
- Certificate of compliance
- Incoming parts verification and inspection

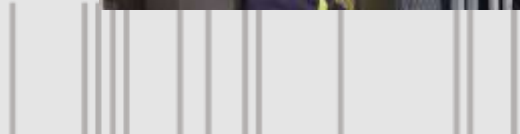

Applications

- Medical devices, endoscopy, laparoscopy, ultrasound probes, medical imaging
- Telecommunications
- Defense and aeronautics: radars, missiles, military transport, aircraft, navigation and communication systems
- Electronics
- Boating
- Other Industries

How we work

WHY NORDHILL ELECTRONICS?

High Quality
Competitive prices
Quality control
Complex solutions

Focusing on the long term partnership
Supporting social – children's activities in the country
